

Instructions for Deleting a Page

Deleting a Page

These steps remove a page entirely from your site, not just from the left-hand sidebar. See separate instructions if you only want to remove a page from your sidebar.

1. In editing mode, navigate to the page you want to delete, using either the page's name on the left-hand sidebar or the sitemap (if the page's name does not appear on the sidebar).
2. In the upper right corner, select the dropdown menu under "More."
3. Select the trashcan icon with "Delete Page" (under "Page actions").
4. When asked in the pop-up box if you really want to delete the page, click the red "DELETE" button and the page will be removed.
