

# AQUA BUGS

## THE MACROINVERTEBRATE ID APP

The Aqua Bugs app helps solve bug ID mysteries with a few simple questions. Clear directions paired with simple line drawings walk you through each choice. Like magic, the name of your bug will appear along with a gallery of photographs and brief description of its key features.

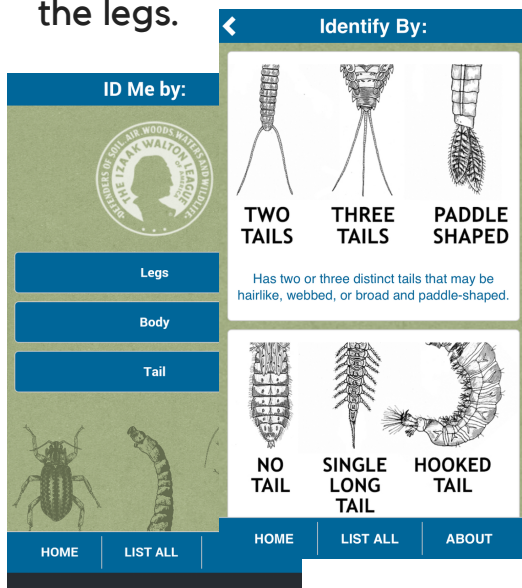

1. Download Aqua Bugs from the App Store (iPhone) or Google Play (Android).

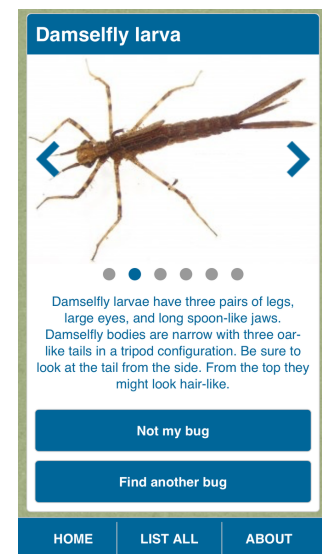

2. Collect macroinvertebrates at your local stream.

3. Follow the prompts on Aqua Bugs to identify your macroinvertebrates. Start by choosing an identifiable feature on your bug, such as the legs.

4. If Aqua Bugs brings you to a macroinvertebrate that is not the one you are trying to identify, select "Not my bug" and the app will show you similar macroinvertebrates.

5. Record your findings and keep identifying more bugs! Save Our Streams data forms can be found at: [www.iwla.org/sos](http://www.iwla.org/sos).
