

NITRATE WATCHSM

IZAAK WALTON LEAGUE OF AMERICA

Data Sharing Instructions

1

Create an account on the Clean Water Hub

The Clean Water Hub is the database where all Nitrate Watch readings are reported. Visit www.cleanwaterhub.org/nitratewatch and follow the prompts to create an account!

Already have an account on the Hub?

You're all set!

CLEAN WATER HUB

2

Measure nitrate in your waterways

Choose your water source

You can sample tap water, streams, rivers, lakes, ponds, drainage/outlet pipes, and more!

Use your nitrate test strips

Follow the instructions in your Nitrate Watch kit to accurately measure the amount of nitrate in your water source.

3

Share your data on the Clean Water Hub

1. On a phone or computer, navigate to www.cleanwaterhub.org/nitratewatch. Log in to the Clean Water Hub or create a new account.

2. Click on **CREATE NITRATE WATCH READING**

3. Select an existing site from the dropdown menu or click "Create a New Site"

4. Fill out the form for your site. Double-check form and click **SAVE CHANGES** when you are finished.
