

1 Sign up for a Water Reporter Account

Download the Water Reporter app

Add the Water Reporter app to your iOS or Android smartphone from your app store.

Set up your profile

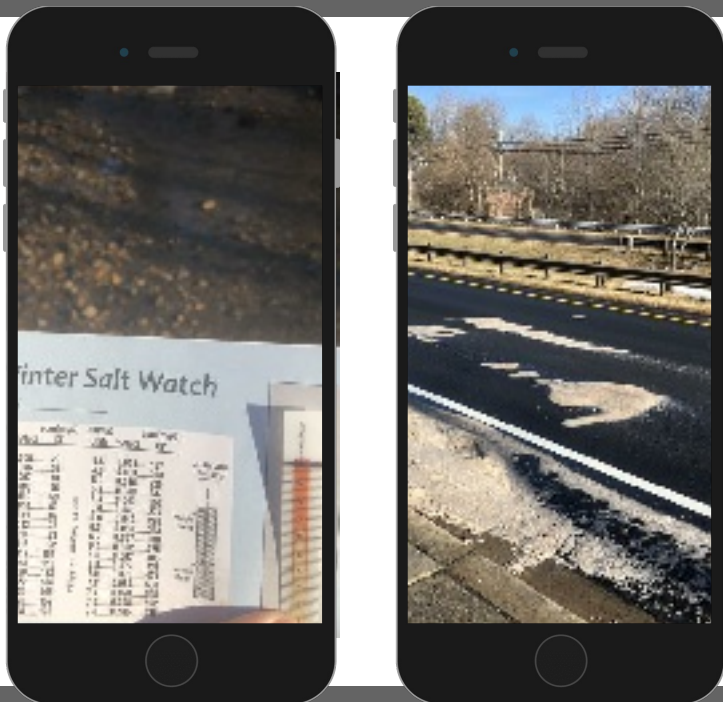

Log in to create an account profile. Join the Izaak Walton League Group to share your reports with us.

Turn on location services

Confirm in your settings that Water Reporter has access to location services so reports can be identified on the map.

2 Snap photos for the #SaltWatch campaign

Share chloride sample readings

Follow the instructions received in your test kit to conduct your chloride test sampling. When you take the photo, make sure your photo clearly displays the freshly used chloride strip.

Identify road salt pile locations

When you come across a large pile of road salt, take a photo and share that photo through the Water Reporter app.

3 Share your photos on the Water Reporter App

1. Add your photo to the report.
2. Include **#SaltWatch** in the comments field!
3. Confirm the report location.
4. Share with the Izaak Walton League Group
5. Press Send.
